

# COSMETICS - PLACING ON THE EU MARKET

## 1<sup>st</sup> step

### TESTING

we offer following tests:

- microbial safety
- stability testing (microbiology and physico-chemical parameters)
- preservation efficacy test
- skin irritation (on volunteers, on artificial skin)

... in most cases are satisfactory, any other necessary tests can be subcontracted

## 2<sup>nd</sup> step

### SAFETY ASSESSMENT

you will be asked for:

- exact product composition
- documentation for raw materials (MSDS, Certificates of analysis ...)
- instructions for use
- manufacturing process
- text on the label
- information on packaging
- results of laboratory test

... and another documents related to the product

## 3<sup>rd</sup> step

### REGISTRATION TO THE CPNP

you will need:

- product photo
- product label
- registration data about the company and the product

... with the personal participation of the cosmetic product representative or after signing a power of attorney
